

FEMA

FEMA P-767, *Earthquake Mitigation for Hospitals*

TRAINING DESCRIPTION

In this training, participants are introduced to earthquake hazards in health care settings and learn about methods that can be used to analyze and reduce risks of damage in hospitals and other medical buildings. Such facilities have unique nonstructural components, including equipment and infrastructure systems that can become sources of injury or damage even during smaller earthquakes. By implementing sound, cost-effective mitigation measures, health care facilities can reduce seismic risks and ensure that, in the event of an earthquake, they can remain in operation to serve their communities.

TARGET AUDIENCE

The target audience for this training includes hospital facilities managers, engineers, administrators, and other hospital personnel.

GENERAL INFORMATION

Time: 8:00 a.m. – 5:00 p.m. CST

Date: April 10, 2018

Location: Baptist Memorial Hospital, Magnolia Room 1, 1100 Belk Boulevard, Oxford, MS 38655

Instructor: Mike Griffin, P.E., Principal, CCS Group

Materials: FEMA P-767 CD containing a pdf of the presentation; FEMA 396 report, *Incremental Seismic Rehabilitation of Hospital Buildings: Providing Protection to People and Buildings* (hard copy); and FEMA E-74 report, *Reducing the Risks of Nonstructural Earthquake Damage*, has relevant information on reducing nonstructural risks in hospitals and can be downloaded from the following link:
