

GET YOUR HOME READY FOR EARTHQUAKES!

JOIN US FOR AN INFORMATIVE SEMINAR ON HOW TO PREPARE FOR EARTHQUAKES AND OTHER DISASTERS...

200 years ago, a series of large earthquakes hit the Bootheel of Missouri. These earthquakes destroyed the town of New Madrid and also created Reelfoot Lake in northwest Tennessee. Were they to happen today, these seismic events would cause widespread damage and disruption to the region and the nation.

Since January of 2008, there have been more than 500 earthquakes in the central United States. Some of these were felt over a large area of the region. When and where the next one will occur and how large it will be, are difficult, if not impossible, questions to answer with any certainty; however, reducing the vulnerability to damages is possible.

Even during smaller earthquakes, contents of your home can be susceptible to damage if not properly secured. By using sound, cost effective techniques, your losses can be reduced, and in some cases eliminated.

The Central U.S. Earthquake Consortium and the Missouri State Emergency Management Agency are pleased to invite you to a two-hour seminar on the basic principles of earthquake hazards and ways that you can reduce your risk from earthquakes.

GET READY TODAY, BEFORE IT IS TOO LATE!!!

SEMINAR DETAILS

DATE

Monday - February 20, 2012

LOCATION

*AARP Building
Highway 34
Piedmont, Missouri 63957*

Hosted by the AARP Piedmont Chapter

TIME

11:00 a.m. - 1:00 p.m.

PROGRAM

*Overview of Earthquakes
Be Ready for Earthquakes
Do-It-Yourself Projects
Question & Answer Session*

OTHER INFO

This seminar is free and open to the public. No prior earthquake knowledge is required. Refreshments will be provided!

For more info - (800) 824-5817

*This workshop is being presented by the
Central U.S. Earthquake Consortium, in partnership with
Missouri State Emergency Management Agency and the
Federal Emergency Management Agency*
