FEMA P-767: *Earthquake Mitigation for Hospitals*

TRAINING DESCRIPTION

In this training, participants are introduced to earthquake hazards in health care settings and learn about methods that can be used to analyze and reduce risks of damage in hospitals and other medical buildings. Hospitals and other healthcare facilities have unique nonstructural components, including equipment and infrastructure systems that can become sources of injury or damage even during smaller earthquakes. By implementing sound, cost-effective mitigation measures, healthcare facilities can reduce seismic risks and ensure that, in the event of an earthquake, they can remain in operation to serve their communities.

TARGET AUDIENCE

The target audience for this training includes healthcare facility and risk managers, engineers, administrators, planners, and other personnel.

GENERAL INFORMATION

Date: April 4, 2019

Time: 8:00AM – 5:00PM CDT

Location: Heartland Regional Medical Center
3333 West Deyoung St.
Marion, IL 62959

Cost: There is no cost to attend this training; Lunch will be provided.

Other: Materials and certificate of completion will be provided.

REGISTRATION
